

CS 8 ? Indent

Crimpen

WEZAG

This tool is made for these applications

Different contact sizes for machined pin and socket contacts

Various machined round connectors conforming to MIL or equivalent standards

That is particularly

8-indent for precise crimping results. Four crimpers, each with two crimping points, produce a uniform crimp pattern.

Take advantage of our existing tool options. Just let us know your processing requirements, and we'll check which solution is already available for that.

Or we can develop a solution for you. We'll customize the crimp profile and positioner to fit your contact and meet your requirements.

8-indent or four-prong? Both are possible. Depending on the application, we can configure the four crimpers with double embossing or as a four-prong version.

Fine adjustment in 0.01-mm increments. Use the analog scale to adjust the crimp height continuously. The locking mechanism prevents your setting from being accidentally changed.

Your contact is positioned just right. The positioner reliably moves it into the correct position for the crimping process.

If you'd like, we can also provide a complete tool kit right away. Supplement your crimping tool with matching release and wire-stripping tools, selected specifically for your application.

These functions make crimping more convenient

Tool lies comfortably in the hand thanks to soft handles with anti-slip protection.

Further advantages offered by our Made in Germany standard

The integrated guide makes the replacement of tool heads fast, error-free and always delivers reliable crimping results.

Always a compliant crimp - the positive lock ensures this. Can be unlocked in the event of incorrect operation.

Manufactured from special steel, specially hardened and tempered parts - quality that lasts.

No unnecessary play within the individual parts thanks to precise manufacturing, resulting in maximum reliability.

Tool is optimally set at the factory. It is not possible or necessary to adjust the crimping force.
